

## **List of Shaanxi Official and Trade Delegation to Turkey, İstanbul**

*17 June 2010, 09:30*

*DEİK/TOBB Plaza*

	<b>Name</b>	<b>Position</b>	<b>Institution / Company</b>
<b>01</b>	Mr. Wu Dengchang	Vice Governor	Shaanxi Province
<b>02</b>	Mr. Xu Pusheng	Vice Chairman	Shaanxi Industry and Information Technology Department
<b>03</b>	Mr. Huang Xiaoping	Chairman	Shaanxi Nonferrous Metal Group Co., Ltd.
<b>04</b>	Mr. Tian Panlong	General Manager	Shaanxi Electrical Information Group.
<b>05</b>	Mr. Bai Jianwu	Vice Chairman	CCPIT Shaanxi
<b>06</b>	Mr. Hu Gang	Cadre of General Office	Shaanxi Provincial Government
<b>07</b>	Mr. Wang Zhichun	Chairman	Shaanxi Photovoltaic Industry Co., Ltd.
<b>08</b>	Mr. Zhu Jinghui	Vice General Manager	Shaanxi Huanghe Group Co., Ltd.
<b>09</b>	Mr. Song Tao	Vice General Manager	Shaanxi Fenghuo Communication Group Co., Ltd.
<b>10</b>	Mr. Qian Xuezhu	Assistant to the General Manager	Shaanxi Electrical Information Group
<b>11</b>	Mr. Ding Erbing	Vice Section Chief	Shaanxi Industry & Information Technology Department.
<b>12</b>	Mr. Liao Yulong	Section Chief	CCPIT Shaanxi Sub-Council and Shaanxi Int'l Chamber of Commerce
<b>13</b>	Mr. Li Zhu	Vice General Manager	Xi'an Chuanglian Electrical Science & Technology Co., Ltd.
<b>14</b>	Mr. Dang Shengli	Chairman	Xi'an Liming Electronics Science & Technology Co., Ltd.
<b>15</b>	Mr. Xue Zhengjun	Chairman	Xi'an Qichuang Solar Energy Science & Technology Co., Ltd.
<b>16</b>	Mr. Li Ximin	General Manager	Xi'an Xinshi Mechanical & Electrical Equipment Co., Ltd.
<b>17</b>	Mr. Zi Rong	Chairman	Shaanxi Rongwei Investment Co., Ltd.
<b>18</b>	Mr. Liu Zeng	General Manager	Shaanxi Rongwei Investment Co., Ltd.
<b>19</b>	Miss Zhao Shuangpin	General Manager	Shaanxi 3G Interactive Science & Technology Co., Ltd.

## **Company Profiles of Shaanxi Trade Delegation to Turkey, İstanbul**

*17 June 2010, 09:30*

*DEİK/TOBB Plaza*

### **Shaanxi Nonferrous Metal Group Co., Ltd.**

Shaanxi Non-ferrous Group is an industry group who combines the state-owned assets running property right supervising and non-ferrous metals resources exploring. Now it has enough strength to explore the non-ferrous metals at home and abroad independently, and its industrial production and scientific research strength are also in the leading position. Its products can stand in highly competitive position in domestic and overseas. Now it has formed a relatively integral and comprehensive system ranging from ore-mining and dressing, smelting and processing, exploring and designing manufacturing, trading and real estate developing, and so on and so forth. It has twenty-one holding companies three institutes one trustee company and one share-holding company, with a total staff of more than 28,000. Since China's 10th Five-year Plan, the Group has been keeping in gain wholly. Its industry output sales revenue, rate of export for foreign currency tax and profit and 5.12 billion RMB in the end of 2000 to 44 billion RMB in the end 2008. Now it has become a large-scaled enterprise of Shaanxi province, whose economy increases faster with a stronger profitability and Shaanxi local features. Up to now, it could participate in international competition confidently.

### **Xian ChuangLian Electronic Component (Group) Co,Ltd**

Xian ChuangLian Electronic Component (Group) Co, Ltd takes the lead in researching and manufacturing electron primary device, semiconductor new material and electronic installation in the industry in the past 30 years. Now it is one of the top 100 electronic component manufacturers in Mainland China (It rank No.17 in 2009).Its strategic target is to build up the company into a first-class enterprise in China and world-famous electron primary device manufacturer so as to make more contribution to China's electronic industry.

### **Xi'an Liming Electronic Technology Co., Ltd.**

The company is one hi-tech enterprise which professionally develops and is engaged in the research & development as well as manufacture of high-power LED lighting products. It has trained a group of scientific and management talents with self-control, photoelectric integration, industry structure design in the field of high-power LED lighting. It takes the lead in developing numerous top-ranking products at home and abroad in the application area of LED, in which, multiple products have formed a production capacity on a large scale.

The company successively researched and developed:

1. Safety lamp with LED cold light source
2. LED railway signal

3. LED explosion-insulating Laneway lamp
4. LED explosion-proof lamp
5. Expressway LED tunnel illuminating lamp
6. LED city road illuminating lamp with high power capacity
7. LED high-pole lamp
8. LED solar road illuminating lamp
9. LED subway illuminating lamp
10. LED tube lights
11. LED bulb

In order to accelerate the promotion of energy-efficient LED lighting products, the company has built an industrial park of LED Application Engineering, the total area of scientific research building and production building is 16000 square meters, which is the production base of LED lighting fixture with maximal scale in the northwest region of our country. All of illuminations in the park adopt LED.

#### **Xián Chicon Solar Energy Technology Co., Ltd.**

The company was founded in 2006, located in the export processing zone of Economic and Technological Development District in XI'AN. CHICON is an innovation-base and high-tech enterprise which specializing in application and development of solar energy technology, integrating R&D, manufacture, sales and service.

CHICON Company has more than 20 specialized cooperating plants at home and abroad with more than 200 staff. CHICON has become one of the fastest growing private enterprises in solar energy industry with 8 series of products on solar PV and semi-conductor lighting, more than 600 varieties with 2000 specifications.

CHICON now has an international and high quality R&D team based on the research institute of XI'AN JIAO TONG UNIVERSITY. We process many kinds of independent intellectual property rights. Meanwhile, our company keeps long-term technical cooperation and exchanges with many famous international research institutes. CHICON has maintained a leadership position in the research and application of solar energy lighting industry.

#### **Shanxi Sanji Interactive Technology Co. Ltd.**

Shaanxi Sanji Interactive Technology Co. Ltd. was incorporated in Xi'an Hi-tech Industrial Development Zone in 2001, and the registered capital was RMB 10,000,000. The company's major business is to provide China Mobile, China Telecommunications, and China Unicom value added service, which includes Coloring Ring Back Tone, Multimedia Messaging Service, Short Message Service, Mobile Games, Wireless Application Protocol (WAP), Interactive Voice Response (IVR), Business Process Outsourcing Service (BPO), communications equipment, and etc. The BPO department has over 200 employees. The majority of its business is to provide call center service, telemarketing and other value added services, build commercial value and lower the operation cost for China Mobile. After persistent development, it has already become to be one of the most powerful overall communications value added service providers in Shaanxi

Providence. Sanji's faith is "People Foremost, Grow Together, Lead Technology Trend, and Pursue Super Excellence". The company pays attention to the staff training, and provides every staff growing platforms. Sanji Company is growing to be the first-class IT corporation with all of the staff consistent hardworking.

### **The Shaanxi Electronic Information Group**

The Shaanxi Electronic Information Group is a state-owned large-scale military industry electron enterprise, Its registered capital is 1.12 billion Yuan. The main product includes: Radar complete machine, communication facility, navigation aid, electronic special purpose equipment, electronic primary device and so on. Many of its technology has reached the international advanced level or the domestic top level. Some products are in the monopoly status in the domestic market. The group has 8 enterprises which undertaken many projects for the national defense development.

### **Shaanxi Fenghuo Communication Group Co., Ltd.**

Established in 1956, Shaanxi Fenghuo Communication Group Co., Ltd., is one of the main manufacturers in communication equipment and electroacoustic component in China. The main products of the company include: HF communication equipment, VHF communication equipment, electro-acoustic component, sound equipment, vehicle test equipment, wire and cable. These products are extensively used in national defense communication, earthquake relief and flood control, forestry, mining, ocean shipping and public transportation. The company has passed the International Quality Assurance System Certification ISO9001 in 1998.

### **Shaanxi Huanghe Group Co., Ltd.**

As an international Hi-tech electronic company, Shaanxi Huanghe Group Co., Ltd. is the biggest radar manufacture factory in China. It has an area of 850,000 square meters. HUANGHE was put into production in 1958, and in the period of more than 50 years after establishment, it has developed and manufactured thousands of military electronic equipment of more than 40 kinds or so. As the most advanced reconnaissance & guidance weapon systems in China, these military electronic equipment are mainly used to equip the Chinese Army, and have gained good reputation for advanced performances, reliable quality plus in time after-sale service. As one of the chief research & manufacture bases of radar systems of China, the Group sincerely hopes to be your good cooperation partner.

### **Xi'an Xinshi Machinery & Electronic Equipment Co.**

Xi'an Xinshi Machinery & Electronic Equipment Co. is a joint-stock company specializing in agency for imported first-class mechanical and electrical equipment such as valves. Our products are widely used in power generation, petroleum, chemical industry, metallurgical and other large state-owned enterprises and key projects. The company will provide the best products and satisfactory service for our users to receive popular trust and praise.

### **Shaanxi Rongwei Investment Co., Ltd.**

Shaanxi Rongwei Investment Co., Ltd. is a specialized investment company invested mainly in coal, mineral resources and real estate industries as well as related financing business. The Company is located in Yulin City, Shaanxi Province, with some branches and offices in Xi'an and other places. The Company's Youliangfang Coal Mining Company and other four coal mining companies in Shenmu County are mainly engaged in coal mining, ore dressing, coal production, transportation and marketing. The annual production ability of raw coal is more than 1 million tons and the annual output value is over 400 million Yuan.

#### **The Shaanxi Photovoltaic Industry Co., Ltd**

The Shaanxi Photovoltaic Industry Co., Ltd is a high tech enterprise concentrating on design, research, manufacture, engineering and trading for Photovoltaic products. The company plan to invest 10 billion Yuan in the next 5 years in photovoltaic industry system integration, the key technologies development, the platform construction for experiment examines etc. Through building industry platform, the Company will take the lead in the photovoltaic industry development and thus to make the contribution for Shaanxi economy development.

#### **BP SunOasis Co., Ltd, (Xian SunOasis Co., Ltd)**

The company was established in 2003, is a joint venture between BP p.l.c. and Xinjiang SunOasis Company Limited, which was established in 18th, Nov. 2005.

BP Sunoasis is a leading photovoltaic product manufacturer in China. We established two manufacture firms and one professional product applications R & D laboratories in Xi'an Export Processing Zone. There are 10 international standard automatic production lines with automatic glass washing machine, laminating machine, dispensing machine, flash tester, IR Tabber and frame machine etc. We adopt BP Solar more than 30 years of professional R&D results for PV module design. Our pre-production checked by scientific and rigorous internal and international certification tests. Our product gets various certificates like UL electrical and fire safety certification, TUV Rhineland certified as Class II devices, IEC61215 and IEC61730 certification, VDE certification, ETL certification, FM certification, KEMCO certification, CE certification and GD golden-sun certification. With highly reputation, our products have commanded a good sale in European market, and have got the Euro qualified supplier certification in 2004 and 2005; meanwhile, our product is used for many signature projects which is actualized by National Development and Reform Commission, such as rural solar power station project in western provinces, the largest 150kw power station in Asia, etc.

Our core business is to develop, manufacture and sell high-performance solar photovoltaic modules. We also design and supply solar electricity systems to suit a wide range of applications, including residential, commercial and industrial applications. Our services include solar system design, construction, installation and maintenance. Currently, our annual manufacturing capacity is 220MW. The expansion transformation is still going on. It is forecast that the annual manufacturing capacity will be 500MW in 2012.
